

SA CYCLONE ANTISTATIC DUCTING SYSTEM

Extremely durable antistatic ducting.

The SA CYCLONE ducting system allows you great flexibility with a fully customizable range of highly robust antistatic ducting, couplers, Y-couplers, plus adaptors and reducers that allow you to safely ventilate virtually any application.

With new and improved construction and attachment methods, our unique antistatic ducting is available on very short lead-times, with many items held in stock.

The flexible antistatic ducts 5 or 10 metres long are supplied individually in a dedicated holdall. Duct couplers are also available to enable longer duct lengths to be created. The adaptors/reducers are designed to allow attachment of ducts and fans of various sizes.

KEY FEATURES

- ANTISTATIC
- High quality construction
- Versatile attachment methods
- Longer lengths of ducting
- Available on very short lead times
- Wide range of accessories available

KEY APPLICATIONS

- Shipbuilding & repair
- Underground working
- Vessels and tanks
- Oil refineries
- Offshore platforms
- Chemical plants
